

A group of five diverse young adults (three men and two women) are smiling and posing for a photo in what appears to be an office or creative studio. They are dressed in casual, modern clothing like plaid shirts and t-shirts. The image is overlaid with a teal color scheme and white geometric lines forming a series of interconnected triangles and polygons. The text 'WELCOME TO PLANETIN.IO' is positioned on the left side of the image.

What is **decentralization**? What are its benefits and advantages? Decentralized marketing is created on an automated contract that guarantees you maximum security and stability.

A **smart contract** is an algorithm with automatic execution. It exists inside the Smart Chain blockchain*, which is one of the top cryptocurrencies. Smart contracts, like cryptocurrencies themselves, are decentralized. They work strictly according to a certain program, and once they are launched, it is impossible to change their mode of operation. The code that determines the logic of a smart contract is written in a blockchain, and all calculations are performed by millions of computers around the world. This ensures that a smart contract cannot be hacked or stopped.

* **Blockchain** is an immutable register of transactions and information, protected from any further manipulation by cryptographic methods. It is simultaneously maintained by thousands of independent computers around the world.

BUSD is a cryptocurrency with a fixed exchange rate that is equal to \$1.

5 benefits of BUSD for Planet:

1. Fixed Cost. Your Planet performance is no longer affected by rate fluctuations and market corrections.
2. All the opportunities that cryptocurrency provides. BUSD token can be exchanged for any cryptocurrency on DEX exchangers with negligible fees in a couple of clicks.
3. Simple calculations. Registration fees, upgrades, and cycles are now specified in US Dollar equivalents.
4. Precise planning. You can accurately track costs and estimate results without wasting time converting from one unit to another.
5. Protection of participants' interests. BUSD is fully backed by the US Dollar at a ratio of 1:1 and can always be exchanged for Dollars.

Planetin marketing is implemented on the Smart Chain blockchain smart contract technology. The marketing employs the BUSD token in the BEP-20 format with a stable exchange rate of 1 USD. To send BUSD or any other token functioning in the Smart Chain blockchain, you will need a certain amount of BNB to pay the fee.

-  **BNB** — This is the internal BEP-20 format coin of the Smart Chain blockchain, which is required to pay the transaction fee.
-  **BUSD** — This is the BEP-20 format Smart Chain blockchain coin with a stable rate of 1 USD.

The graphic features a yellow background with a dark grey bar at the top. The text "What is" is in large, bold, black font, followed by "BUSD" in a slightly smaller, bold, black font. Below the text, there is a logo for "SMART CHAIN" consisting of a yellow diamond shape with a black outline and the text "SMART CHAIN" next to it. To the left of the main graphic, there is a stylized representation of a stack of coins or blocks, with three yellow bars at the bottom and a yellow diamond shape above them.

Planetin marketing is a matrix system based on decentralized smart contract technology. Profits come from inviting new partners to your team, who once registered stay with you forever since it is recorded in blockchain. The income is distributed automatically and instantly to the personal wallets of the participants.

Participants have access to 15 marketing programs, different in terms of profitability and conditions of interaction between partners. The most efficient method is to use all of these programs is that you start with 25 dollar .You have to earn 25*5=125 dollar then 60 dollar program is activated.

The validity of the levels is not limited. By activating any level of the program once, it is assigned to you forever and does not require any additional rewards.

Higher levels = more income. Marketing income is generated from the value of the level in which your partner took a spot. Therefore, working at higher levels increases your results. Marketing is built in such a way that income from one cycle is enough to activate the next level.

The number of cycles is not limited. A Package activated once allows you to invite an unlimited number of new partners.

Referral link. All personal partners whom you invite are assigned to you forever, and this cannot be changed, since it is recorded in a smart contract.

Of course, you can start with 1 level. But it is recommended to activate at least the first 4 levels right at the start. This will allow you to get good results from the very beginning. Such a strategy can maximize your results.

Many successful participants use this strategy of activating several levels from the beginning. They set an example for those below them, and so do they follow. As a result, profits of the whole structure grow much faster. Many start with 4 levels at once, while some start with even more levels.
